Information bulletin | 21-04-2016

Concerning: brine connection on 541N control valve

Dear Customer,

In our continuous effort to further improve the quality of our products, we are implementing the following modification on the brine connection of the 541N control valve; this is the control valve that is used on all Micro, H2Optimo, Sentencia, Maxima, Softena, Slimline, IQsoft and Ultra complete softener systems with electronic controller.

Please see **PDF enclosed** for the complete info bulletin.

Please do not hesitate to contact our sales team if you need any additional information on this topic.

Very best regards,

Your erie water treatment team
