## **Concerning: Cable tie**

Dear Customer,

In our continuous effort to further improve the quality of our products, we are implementing the following modification on all cabinet softeners, except IQsoft and Slimline.

We will install a cable tie for the fixation of the electrical cables between the electronic control panel and the control valve. The advantages of this cable tie are:

- proper fixation and routing of the electrical cables;
- releasable/resealable for ease of maintenance.

This modification will be implemented in our assembly as of today.

Please do not hesitate to contact us if you need any additional information on this topic.
