Concerning: Release Erie connect app for iOS delayed

Dear Customer,

In our continuous efforts to further improve the quality of our products, we are implementing our brand new Erie Connect app, for use in combination with our IQsoft cabinet softeners. The app for Android has successfully been released on Google Play store, but unfortunately we have some delay with the release for iOS on the Apple App store.

Although the app for iOS had already successfully been submitted for testing for release on the Apple App store back in December, we are encountering difficulties with the official release on our account. Therefore we would like to apologize for the inconvenience this is causing and we would like to inform you that the app has been resubmitted for release on the Apple App store. Hopefully they will approve this reworked version and we can inform you soon that this has been released.

We will keep you informed of all modifications reported from the Apple App store.

Please do not hesitate to contact us if you need any additional information on this topic.
