Concerning: Change of the MMX amount

Dear Customer,

In our continuous efforts to further improve the quality of our products and to respond to the feedback of our customers, we are adjusting the amount of the MMX media in our systems. This will be implemented on the ProFlow & Softena MMX by using bags of 12L instead of 25L, which makes filling bigger systems easier.

Model	PF-MMX			
	24	36	48	72
Filter media (ltr)				
Nominal exchange capacity (m ³ x°f)	91	137	182	274
Nominal exchange capacity (m ³ x°d)	51	77	102	153
Service flow rate @Δp 1 bar (m ³ /hr)	3,3	3,4	3,5	3,5
Salt usage per regeneration (kg)	2,4	3,6	4,8	7,2
Rinse water usage per regeneration (ltr)	202	246	348	522
Max. flow to drain (ltr/min)	9,8	9,8	15,1	22,7

This will be implemented for all MMX systems as of 3/09/2018 and a serial number as of S02240964 for complete systems.

Please do not hesitate to contact us if you need any additional information on this topic.
