Concerning: Upgrade of PCB housing on Softena & Maxima Cabinet Softener

Dear Customer,

In our continuous efforts to further improve the quality of our products and to meet the demands of our customers, we are implementing the following modification to the PCB housing of our Softena and Maxima Cabinet Softeners.

Here you will find 2 videos that clearly show the difference between the current and the new configuration; on the new configuration all screw fixations have been replaced by snap-fit fixations, which allows (dis)assembly without tools.

https://youtu.be/mBOI4xZ_4co

<https://youtu.be/mq7Pv14uG9k>

This modification has recently been introduced in our production.

Please do not hesitate to contact us if you need any additional information on this topic.
